# MANAGEMENT

Identification, Controlling & Elimination of Industrial Wastages

Several Industries of Pakistan are closed & still a lot of these are on the road to close. The major reason is wastages & not the utilities rates or local environment as claimed. Almost 10 years back a study was done by an International Agency & they found that at that time **Rs. 450 Billion** was the waste due to our systems weaknesses. Now this waste must be over **Rs. 500 Billion**. Another study reveals that our most of the products in International Market are non-competitive by 10%. This means if our industry eliminates its wastages, then it can easily Survive & Compete in International Market.

This important area is ignored by our Industries right from its inception in 50s. Due to significance of this important area PHMA in collaboration with SMEDA feels proud to announce One Day Training on Waste Management

## Some of the Contents:
